

JB ENTERPRISES is a "high tech" small business capable of providing hardware and software systems analysis and design engineering for complex telecommunications and computer networks, signal, data and information processing systems and engineering support functions.

Jesse F. Berry, founder and President of **JB ENTERPRISES**, is a graduate electrical engineer (MSEE, BSEE) with more than thirty-five years experience in systems design and development, and in managing multi-disciplinary hardware and software engineering task forces. As president, he is responsible for providing the strategic direction and guiding the company in pursuit of its corporate objectives.

JB ENTERPRISES is dedicated to, and practices, a philosophy of responsiveness to clients' dynamic requirements by focusing on the following:

Integration of state-of-the-art technologies, products, and services.

Providing full service programs that deal effectively and immediately with increasingly complex business problems requiring long-range strategic plans and short-term tactical actions.

Creativity, efficiency, flexibility, and versatility in order to meet the evolving needs of the client.

Maintenance of the highest standards of Quality and Competence from the earliest planning stages through the development and implementation of problem solutions—no matter what the size of the project.

Continuing development and maintenance of a project organization that includes highly skilled and motivated professionals with a history of accomplishment in their respective fields.
